2016 CATALOGUE

Dear NeXtime Friends,

I hope 2016 will be a year with many good times and happy moments for everyone. With this happy thought in mind we created this new catalogue. I think it is important, now maybe more than ever, to cherish the special moments we have together. These memories and the good times, are the moments we remember and NeXtime would like to be a part of that.

NeXtime creates products that not only show time but also make you feel good and make you realize how beautiful time and timepieces can be. Have a look at this new catalogue and enjoy the special moments.

As always we worked with many designers to realize this new collection. We introduce many interesting new items that fit the current trends in living and fashion. We enriched our collection by working with new materials and expanding some ranges. This created a great new catalogue which shows timepieces for many people. In this new catalogue we been working on creating a new way of grouping our collection with a focus on our different types of stores.

In 2015 the online business has grown double digits and we believe this trend will continue in the next years. Online business needs a different way of thinking and promoting your product. With our new website, more online content and more online marketing we hope to support our customers on every level to make the growth in this channel possible.

I believe 2016 will be an exciting year with many special moments, we hope NeXtime will help you to enjoy these moments even more.

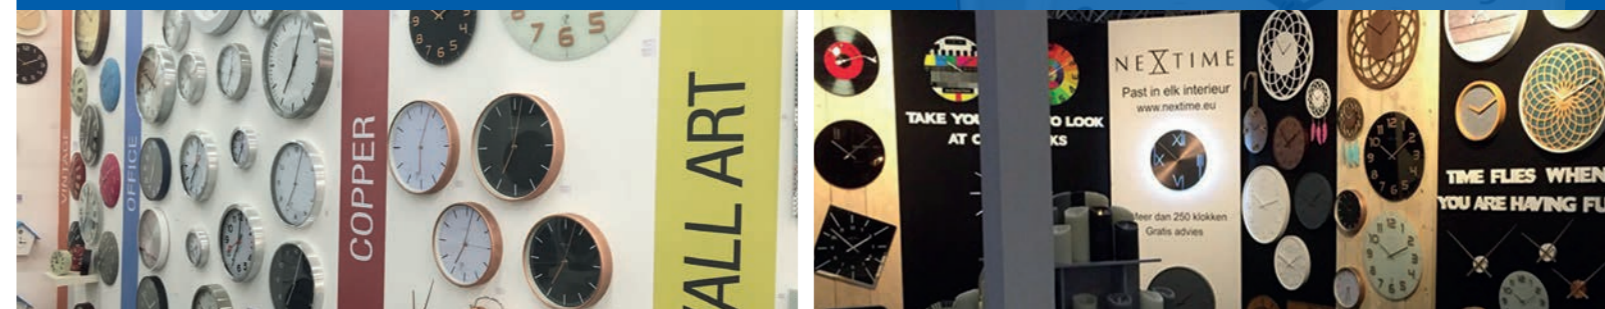

See you NeXtime

DESIGNERS

In addition to the in-house designers we work with freelancers who have a wide variety of skills. You can also become one of our designers. If you have a great concept you would like to share with us you can be included in the next catalogue.

Mail your ideas as detailed as possible to: productdesign@nextime.eu
It is time for an 'up close and personal' with some of our designers. Check out the rest of our design team online: www.nextime.eu/designers.html

STORES

From our humble beginnings and in the establishment of the NeXtime brand 45 years ago, retail stores have always played a key role. With tens of thousands of stores around the world now, it's clear that our love for beautiful clock designs transcends language and culture. To this day we're still amazed by how warmly our clock designs have been embraced by millions of people around the

world. And we're still expanding; sharing our love for clocks and bringing value to stores around the globe. Here are some great examples of stores that make it faster and easier for shoppers to find our products which are proven to increase shopper spending. Retail stores committed to become a NeXtime brand center benefit the most and receive special store support.

A few DESIGNERS

STUDIOPANG (IT)
Fabio Damiani and Marco Quistini created studioPANG in October 2012, with the common idea that by combining different skills and passions, the project approach is enriched with new issues and perspectives. Design, architecture and communication are places of comparison before becoming a projectual theme. After few months, they got awarded at various competitions of design, architecture and graphic.

NEXTIME

CARUSO D'ANGELI STUDIO (IT)
What we do it cannot be defined just 'work': it's passion, creativity, research and will to know. In a graphic, product or exhibit design project, what we consider important is surprising, making happy, telling stories.

JETTE SCHEIB (DE)
Jette Scheib studied industrial design at the University of the Arts (UdK), Berlin, and has worked since 2005 as an independent product designer specializing in home accessories. Her work can be plain and pure or narrative and playful, but often with a little twist that adds a new context or dimension to a functional object. Inspiration is everywhere: whether it is art, music, people and their stories, habits, clichés or simply life itself that feeds her creativity. She lives and works in Berlin.

for more tips

Tips to increase internet sales

1. Show (new) pictures from different angles and in an interior
2. Add an elaborate description of the product
3. Show a short movie of the product

ONLINE-OFFLINE

Online presence can also help to increase offline sales. Some consumers, when they find a product online, like to see it in a brick-and-mortar store before they buy it (on- or offline). Nowadays retailers shouldn't choose for either online or offline; the keyword is omni-channel. Customers want both. They often opt for online because of the large choice, low prices, and to compare products and read reviews. But they also frequently choose offline because of the experience and personal service. Many traditional retailers have already gone online. Now more and more web stores are starting their own brick-and-mortar stores. This way they can reach their target group, wherever they are.

It also helps our main retailers, so-called 'brand-centres'. Since these 'brand centres' appear in the store locator on nexttimestore.com, consumers can find the (nearest) 'brand centre' of their choice, and can decide to see and buy the clock either online or offline. In the end it is how the customer perceives the full shopping experience: from browsing the web store to picking up the NeXtime clock in a 'brand centre'. Retailers can become a 'brand centre' when they display NeXtime designs in a brand-like presentation. Clearly a strong NeXtime in-store presentation that showcases and promotes a wide selection of our designs drives both sales and increases foot traffic. For us it is all about combining the offline and online experience.

NEXTIME STORE

We have also created our own online consumer store (www.nexttimestore.com). The main reason why we created the nexttimestore.com is to be present in all channels.

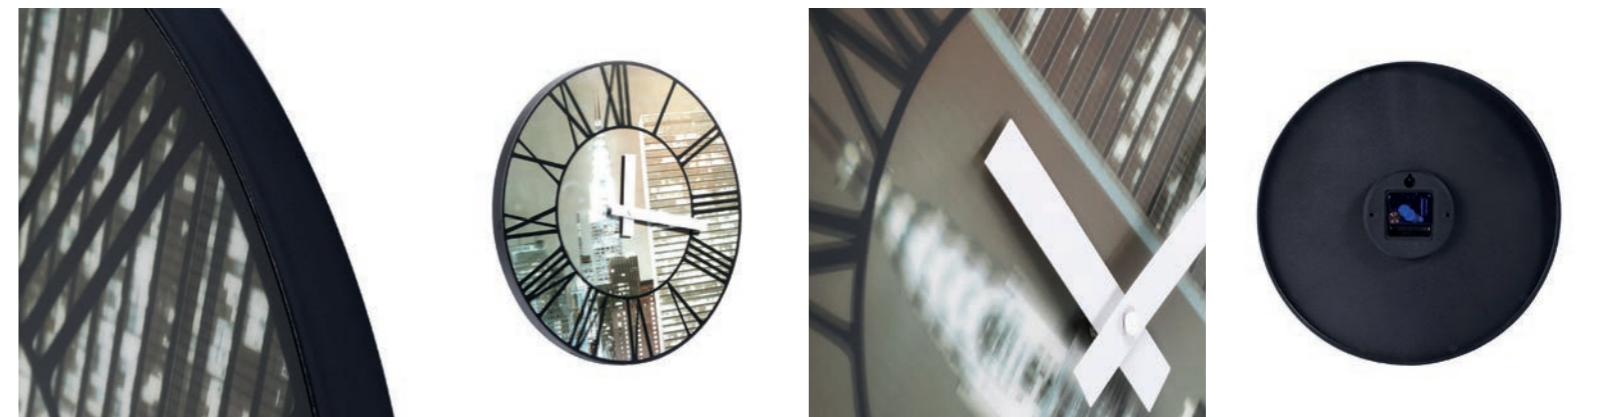

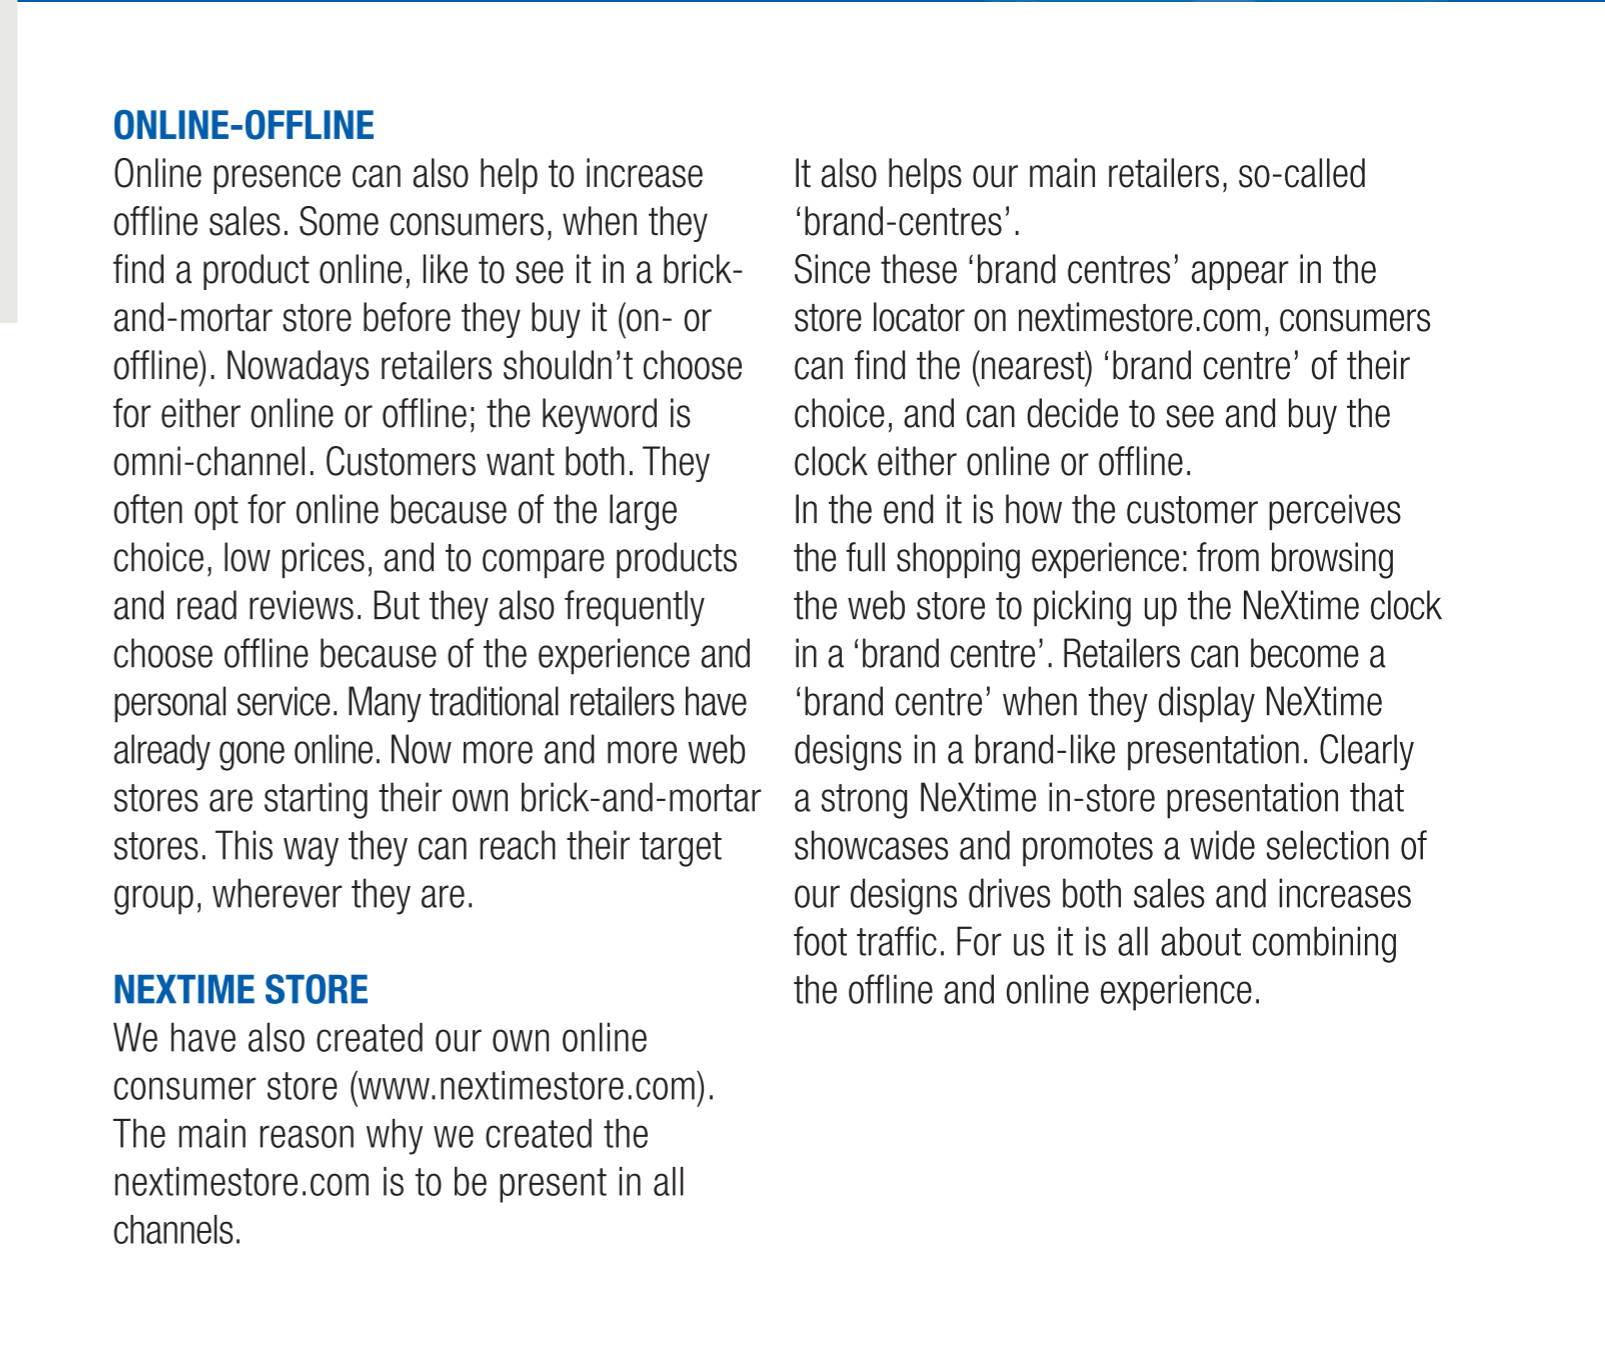

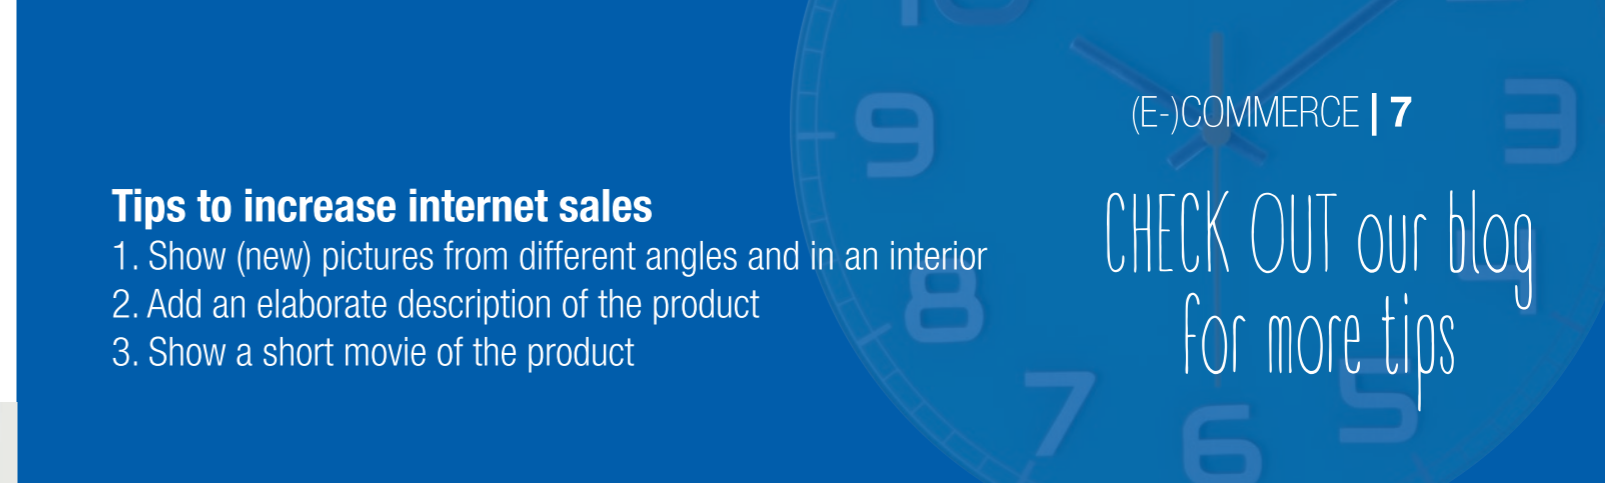

You can
DOWNLOAD
Photos and
movies

(e-)Commerce

HOW TO SELL ONLINE

It is important to make the online experience as 'real life' as possible. Customers want to see, touch, smell and hear the product. We therefore took photos from different angles for most of our clocks and added some interior pictures. We also made videos to show the unique features of a clock, like the movement or sound. Our Download Center is constantly updated with the latest photos; make sure you and your online customer use our latest photos, interior shoots, videos and logos.

To make it easier for the online retailer our ESC (European Service Center) can drop-ship directly to the customer and can supply a csv-feed with all the current information: not only stock and prices, but also all the important features, like size and colours, pictures and movies. This feed can be accessed at a ftp-server and is updated daily. This is a huge help for all online retailers and makes it really easy to sell NeXtime clocks online.

Wood Wood

The Wood Wood is carefully designed and made from sustainably harvested wood. This design radiates wooden sophistication thanks to the spare elegance and clean lines. A quality quartz drive is integrated in the back and adds to sophistication. The entire design including the hands is made of wood and each clock face is unique, reflecting the grain of the wood it was made from.

Dreamcatcher

Dreamcatchers were made to filter out all bad dreams and only allow good thoughts to enter our mind. Women would weave these magical webs for their children. We created a modern version out of wood, to make sure you'll have a goodnight rest when you hang our Dreamcatcher in your bedroom.

Light it up

With this light unit, you can turn every clock into a special piece of art. Simply hang the light unit on your wall and put your clock over it. No need for extra attachments or special tools. Your clock will get a nice glow and with every clock you will get different effects and looks. At the same time the area will be lighted, so there is no use for an extra lamp at your wall, you will have 2 items for the price of 1.

This unit gives LIGHT to every clock

Galileo

The fascination of rusty metals, a simple but accurate design. The brown and white Galileo seem to be old clocks, an oxidized circle, an object modified by the flow of time, that is able to narrate the influence that time had on his skin. While the copper Galileo with its brushed shiny dial, has a more contemporary look.

Projector

The clock is plug and play and will project the clock on any surface you want. The further the distance (1.5 to 6m), the bigger the clock projection (0.5 to 2m). With the turning knob on the clock, you can even adjust the light strength. Because of the use of LED light, the clock is environmentally friendly.

Nice to show the CLOCKS

Display

Code: 9024
Display item 240/280 x 200 cm / Metal

Our display was developed with our customers in mind. A solid long lasting clock presentation made of steel, complete with LED lighting and space to keep stock of our clocks. Plus, it is designed to allow easy cleaning. The NeXtime display is a strong and creative medium to present NeXtime clocks in your store(s) in a 3D environment, thereby enabling long lasting impact and recall value. It is one of the most successful tools to encourage and increase sales. It has lighting and storage space.

- Gain foot traffic and increase on sales
- No need to drill holes in the wall
- Limited use of floor space
- Engage your customers and in turn boost your sales
- Proven to be successful in hundreds of stores in countries around the world
- It has an attractive look
- It triggers customers to buy a clock
- Strong branding
- Customers can help themselves

Clock Rail

Code: 9031
Display item | Hangingbar: 100 x 149 x 3 cm
+ 10 clock hangers | Metal

Our unique NeXtime Clock Rail is a strong and creative medium to present our clocks in a 3D environment, resulting in more customer engagement and boost in sales. Unfortunately not all stores have the possibility for a NeXtime Display and have to forego on the benefits of a striking NeXtime clock presentation. The Clock Rail is NeXtime branded, it can be securely fitted to practically any wall and provides an easy way to hang NeXtime clocks instantly. The NeXtime Clock Rail is uniquely equipped with special 'clock hangers' which simply attaches to the Clock Rail, providing a hanging system for approximately 10 clocks per NeXtime Clock Rail.

- Easy way to hang NeXtime clocks
- Use when there is not a lot of space
- At smaller shops
- It has an attractive look
- It triggers customers to buy a clock
- No need to drill a lot of holes in the wall
- All clocks together for more impact
- Strong branding
- No use of floor space

Accessories

No need for normal batteries anymore. This battery adapter can be plugged in any compatible plug and thus it will reduce the waste

CONTACT

NeXtime is the world's leading clock company. It is the only independent company that has been designing and manufacturing clocks for more than 45 years, and is trading in more than 50 countries around the globe. NeXtime is represented by distributors and is expanding its distribution network worldwide.

Distributors are carefully chosen to represent NeXtime, and we work closely with our distribution partner so that they can provide service to their market and customers with the same dedication and passion for clocks as we do. If you would like to be considered as a distributor, please contact us:
