2017

CATALOGUE

Dear NeXtime Friends,

In retrospect, the 2016 collection was celebrated with a lot of publicity and success. For NeXtime, this year was a breakthrough in terms of being unique, innovative, and a constant thrive of taking initiative. In this new 2017 collection, we let the new ideas and trends of the interior design continue to steer the wheel, and take us to where the future leads us to. In this year's collection, NeXtime experimented a lot with various new materials, the way they work with each other, and more exciting new ideas.

Though I think all of us are struggling what the trend really is, we believe that it all lies in great quality, aesthetically pleasing and reasonably priced products, and of course, a strong brand image. To achieve this, we keep our focuses equally on the existing retail market and on the ever-growing online business.

The 2017 collection was made with all the new goals in mind. Along with our 46 years of experience in making high quality clocks, it will suit the current market with both off and online sales. Please enjoy our selected products, and may this be the best year yet.

See you NeXtime,
Alain Frie

DESIGNERS

In addition to the in-house designers we work with freelancers who have a wide variety of skills. You can also become one of our designers. If you have a great concept you would like to share with us you can be included in the next catalogue.

Mail your ideas as detailed as possible to:

info@nextime.eu

It is time for an 'up close and personal' with some of our designers. Check out the rest of our design team online:

www.nextime.eu/designers.html

A few of our great designers

JETTE SCHEIB (DE)

Jette Scheib studied industrial design at the University of the Arts (UdK), Berlin, and has worked since 2005 as an independent product designer specializing in home accessories. Her work can be plain and pure or narrative and playful, but often with a little twist that adds a new context or dimension to a functional object. Inspiration is everywhere: whether it is art, music, people and their stories, habits, clichés or simply life itself that feeds her creativity. She lives and works in Barcelona.

CHANTAL DRENTHÉ (NL)

London based Dutch designer Chantal Drenthe gets her inspiration from daily routine. Combined with her background in industrial design, she enjoys the creation of functional and aesthetic everyday products. Objects from her hand can be recognised by the play on form, words or life. It is the kind of items that make you question the normal and put a smile on your face.

ZOLTAN B. KECSKEMÉTI (HU)

Zoltan B. Kecskeméti was born in Hungary, and has been working as a 3D artist on video games and animated movies since 2000. He uses his spare time to realize his own ideas and to visualize his plans, like the Motion clock. It started with an idea, then he created a prototype and uploaded a video to Youtube. NeXtime saw the video and they have been working together ever since.

STORES

From our humble beginnings and in the establishment of the NeXtime brand 45 years ago, retail stores have always played a key role. With tens of thousands of stores around the world now, it's clear that our love for beautiful clock designs transcends language and culture.

To this day we're still amazed by how warmly our clock designs have been embraced by millions of people around the world. And we're still expanding; sharing our love for clocks and bringing value to stores around the globe.

Here are some great examples of stores that make it faster and easier for shoppers to find our products which are proven to increase shopper spending. Retail stores committed to become a NeXtime brand center benefit the most and receive special store support.

GREEN TIME

Ensuring environmental, social and economic benefits

This world is shared by all of us, and we have the responsibility to mend what we have done wrong.

At NeXtime, we understand the importance of environmental sustainability, because we really appreciate the calm and peaceful feeling from the nature and the trees, and truly cherish this precious treasure from our mother nature. Therefore we are always trying our best to produce our wood products with FSC certified wood. Besides we love to work with wood, it gives each clock a unique look of their own, and combines perfectly it with all sorts of materials!

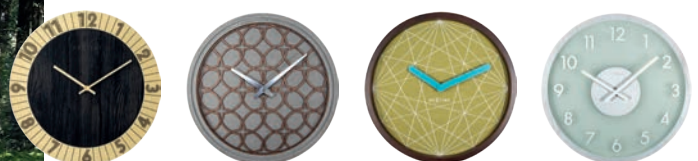

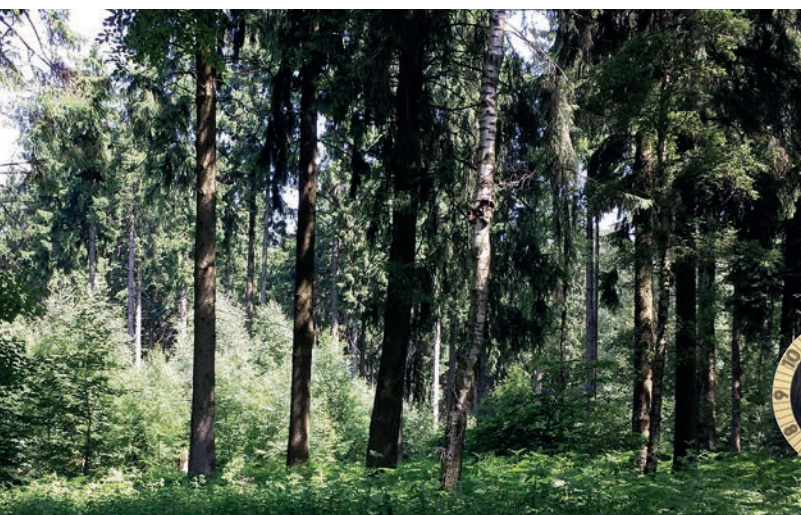

FSC wood in combination with other materials

The Calm clock lives by its name: wood, soft **fabric** in soothing colors and embroidery give it a charisma of relaxation and balance. Who wouldn't want this energy at home! Leave the stress outside: time was never so calm. The Calm collection was enlarged this year, NeXtime now offers 8 different clocks in 3 different sizes. All made from **FSC certified wood** and beautiful **stitched fabric**. The "calmest" and "calmer" clocks are based on the already very successful clock design "calm". But this time we want to give it a bit more detail and a bit more color.

Metallic shades are forever timeless, so is **wood**. With that in mind, **Flare** was designed. The black wooden clock face, with a **metallic frame** and hands, the clash between the two vastly different material gives off a stylish modern look.

The concrete clocks are the fusion of two contrasting worlds and styles. The combination of a traditional oriental ornament from **wood** with the modern and cold material **concrete** creates an interesting and eye-catching design, a modern clock that fits a modern home but will add a nice oriental touch.

With the sustainably-harvested **wood** and **frosted glass**, they compliment each other yet still displaying the distinguishing qualities of each material. With a simple design and the focus on the materials, the **Frosted Wood** clocks are timeless and will always fit in your interior.

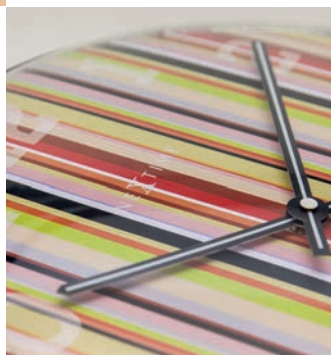

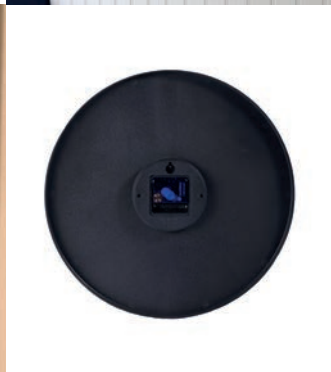

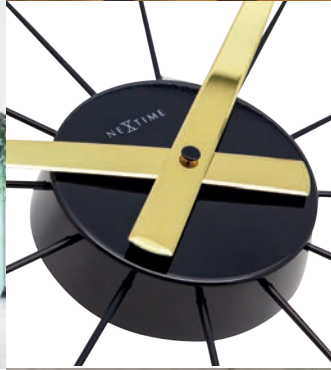

A few of our clocks with FSC Wood

PICTURES, PICTURES, PICTURES

It is important to make the online experience as 'real life' as possible. Customers want to see, touch, smell and hear the product. We therefore took photos from different angles for most of our clocks and added some interior pictures. We also made videos to show the unique features of a clock, like the movement or sound.

Our Download Center is constantly updated with the latest photos; make sure you and your customer use our latest photos, interior shoots, videos and logos.

Tips to increase online sales

1. Show (new) pictures from different angles and in an interior
 2. Add an elaborate description of the product
 3. Show a short movie of the product
-

Home

Clocks that fit a warm home.
These beautiful clocks are made from honest
materials, like wood, concrete and fabric.

CROSS

With the metal element joining the concrete, they create a whole different vibe.

The strong clash of rose gold takes this clock to the modern trendy concrete jungle, stylishly accentuates its present.

Wall clock | 43 cm ø | Metal | Old brown
Including a light unit (code: **3094**)

GALILEO

The fascination of rusty metals, a simple but accurate design.

The white and brown Galileo seem to be old clocks, an oxidized circle, so an object modified by the flow of time, an object able to narrate the influence that time had on his skin. His contour is emphasized by a Led light that let it be also an ambient wall light.

Wall clock | 39.5 cm ø | Wood & Metal | Gold

**IN TOUCH**

The clockface and hands are very much “in touch”.

This clock's whole charme and magic is not about extraordinary shapes or colours, it is simply created by the interaction between matt and shiny parts on hands and face. It is a simple and striking concept that will convince you.

CLASSY

Beautify your wall with a Classy, with its simple and understated glass design and elegant round shape.

It is an attractive timeless design with raised numbers and gentle curves; simple, restrained, and beautiful.

Clock Rail

Code: 9031

Display item | Hangingbar: 100 x 149 x 3 cm
+ 10 clock hangers | Metal

Our unique NeXtime Clock Rail is a strong and creative medium to present our clocks in a 3D environment, resulting in more customer engagement and boost in sales. Unfortunately not all stores have the possibility for a NeXtime Display (9027) and have to forego on the benefits of a striking NeXtime clock presentation. The Clock Rail is NeXtime branded, it can be securely fitted to practically any wall and provides an easy way to hang NeXtime clocks instantly. The NeXtime Clock Rail is uniquely equipped with special 'clock hangers' which simply attaches to the Clock Rail, providing a hanging system for approximately 10 clocks per NeXtime Clock Rail.

- Easy way to hang NeXtime clocks
- Use when there is not a lot of space
- At smaller shops
- It has an attractive look
- It triggers customers to buy a clock
- No need to drill a lot of holes in the wall
- All clocks together for more impact
- Strong branding
- No use of floor space

Display

Code: 9024

Display item 240/280 x 100 cm | Metal

Our display was developed with our customers in mind. A solid long lasting clock presentation made of steel, complete with LED lighting and space to keep stock of our clocks. Plus, it is designed to allow easy cleaning. The NeXtime display is a strong and creative medium to present NeXtime clocks in your store(s) in a 3D environment, thereby enabling long lasting impact and recall value. It is one of the most successful tools to encourage and increase sales. It has lighting and storage space.

- Gain foot traffic and increase on sales
- No need to drill holes in the wall
- Limited use of floor space
- Engage your customers and boost your sales
- Proven to be successful in hundreds of stores in countries around the world
- It has an attractive look
- It triggers customers to buy a clock
- Strong branding
- Customers can help themselves

Modular display. Hang your
collection by only two screws

ACCESSORIES

We offer a large range of accessories for our clocks, including spare parts, so we can offer our clients the best service.

Dropship packing. Pack a clock in only 30 seconds.

Inflatable air bags

Code Small: **PBBAG30**

Code Medium: **PBBAG43**

The inflatable air bags are made out of strong plastic and all the air tubes are individually sealed. So when 1 tube will break, the rest of the bag will stay inflated. Simple put the clock in an un-inflated bag, inflate the bag to the required strength and close with the special double sided tape on the bag. That is all!
You can inflate the bag with a manual air pump, or with a simple, small air compressor.

Make every clock an electric clock

Battery Adapter

Code: **PABATAAEU**

No need for normal batteries anymore. Never replace your battery anymore. This battery adapter can be plugged in any compatible plug and thus it will reduce the waste.
230V / 240V input - 1.5 output

Quality batteries

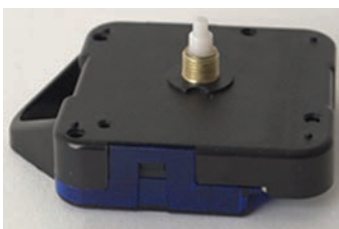

Blister AA Batteries

Code: **AABAT**

Blister with 4 AA alkaline penlite batteries

Various mechanisms and clock parts are available

CONTACT

NeXtime is the world's leading clock company. It is the only independent company that has been designing and manufacturing clocks for more than 45 years, and is trading in more than 50 countries around the globe. NeXtime is represented by distributors and is expanding its distribution network worldwide.

Distributors are carefully chosen to represent NeXtime, and we work closely with our distribution partner so that they can provide service to their market and customers with the same dedication and passion for clocks as we do. If you would like to be considered as a distributor, please contact us: **info@nextime.eu**
